

Contact Smart Card Software Development Kit

incl. Smartcard Commander Professional Version

Overview

This SCM Contact Smart Card SDK contains documentation, software tools, demo applications and source code samples to provide a comprehensive collection of development tools to work with SCM Microsystems' contact smart card reader products. The package contains the professional version of Smartcard Commander, a powerful easy to handle script based software for development and application testing.

Software development companies can use the kit to develop systems, specific to their requirements to meet customer demands or to incorporate contact smart cards based on PC/SC specification into their current applications.

Content

Readers:

- 1 SCR3310V2.0 USB reader
- 1 SCR243 PCMCIA reader
- 1 @MAXX USB-ID000 token reader

Cards:

- 4 Memory Smart Cards (2x 256kbit I2C, SLE4442 and SLE4428 pin protected)
- 2 Microprocessor Smart Cards (ID-000 size punched)
- SIM card adapter

Software on CDROM

- Smartcard Commander professional edition
- PC/SC source code samples for development in VC++, Delphi, C#, VB.NET
- Convenient user interface to access all SDK features
- All necessary device drivers
- Demo applications
- PC/SC and MCard Diagnosis Tools and Documentation

Contact Smart Card Software Development Kit

The SCM Microsystems' Advantage

Trusted Partner

- ASIC (application specific IC) and smart card reader development experience since 1990
- Innovative solutions - more than 50 patents filed
- Reliable high-quality mass production capability - more than 15 Mio. reader solutions deployed to date
- Active role in standardization committees
- Complex project management expertise e.g. U.S. Department of Defense CAC program, electronic ID applications (ePassport, health card projects, national ID, driver licence)

Support

- Global presence and support
- Product customization options
- Product branding
- Dedicated Research & Development and customer support team
- Strong global partnership network with leading suppliers along the value chain (smart card manufacturers, application providers, system integrators, device manufacturers)

Trusted Products

- Broadest portfolio of security technology products - for governments, corporations, financial institutions, small and medium-sized enterprises and individuals around the globe
- Secure smart chip reader design - certified and compliant to EMV, Common Criteria, PC/SC, USB
- High-quality products designed to meet the various requirements in the data security area
- Flexible and future proof solutions - SCM's SmartOS™ firmware and its own ASIC technology allow in Field upgrades and secure your investment
